MemeMaster2023

Whitepaper

Introduction to Meme Master

Meme Master 2023 is an AI generated Meme, NFT and Gaming platform for collectors, traders and creators.

Meme Master consists of 1 billion ERC-20 tokens on the Ethereum blockchain

EMAS holders will be eligible for unlocking features, games, airdrops and more.

Phase 1 - Building the App and Establishing Foundations

- Develop the Meme Master App: Prioritize user-friendly design and make sure it's compatible with various devices.

- Integrate a Meme Creator: Enable users to generate unique and personalized memes with an easy-to-use tool.

- Integrate Wallets: Both web3 wallets for blockchain transactions and non-web3 wallets for standard transactions.

- Develop Meme Master ERC 20 Tokens: This will be the native token for the platform.

- Create a Meme Marketplace where public Collections can be showcased to public and platform users.

Phase 2 - Refinement & User Experience

- All your generated content automatically saved to your Drafts so you can continue editing your creations.

- Establish Galleries: Users can view and explore these curated collections.

- Incorporate Social Media Links: Encourage sharing across platforms and foster community engagement.

- Create a prompt library for far better meme and other creations.

- Integrate Stripe payments for topping up credits.

- IDO Token launch, targeted for June 2023.

Phase 3 - Launch & Enabling NFT Interactions

- Uniswap and CEX listings

- Develop NFT Backend Infrastructure: This will support minting, buying, and selling of NFTs.

- Build the NFT Minting Application: This will allow users to create their own meme- based NFTs.

- Launch Meme Master's Meme-to-NFT Creation Section: This can be an exclusive feature of the platform allowing memes to be converted to NFTs.

- Text to video: Generate video memes by creating an animation or video from text using visual and audio elements.

Phase 4 - Expanding Platform Capabilities

- Educational Content: Provide resources for users unfamiliar with NFTs, blockchain, or crypto.

- Plan and Execute Airdrops: Distribute Memes and NFTs to wallet holders.

- Confirm Coinmarketcap and Coingecko listing.

- Create New Token Listing Platform: This will provide users with access to newly minted tokens, enhancing the ecosystem's dynamism.

- Gaming App Integration: Develop a mini-game section where users can play with/against each other. The games can be meme-themed or utilize user's NFTs

- Introducing Music to Meme Master. Add music to your Memes. Experiment with an AI DJ mixing a playlist for you.

Phase 5 - Time to grow!

- Launch a Decentralized Marketplace: Enable peer-to-peer transaction of memes and NFTs within the platform.

- Listing on more DEX and CEX exchanges.

- Continuous improvement and development following the latest in Meme, NFT & AI movements.

- Ordinal NFTs: Ordinal NFT creation adds an additional layer of uniqueness and value to the NFT ecosystem, appealing to collectors, enthusiasts, and individuals seeking distinct and ordered digital assets.
